

## SOFTWARE-ON-BOARD (SOB)

sponsors the next 100 Offshore students of **Pacific Sailing School**

SOB is a PC-based navigation program which, when loaded with C-MAP charts and connected to a GPS gives real-time on-screen chart positioning and details such as speed and heading.

Enable additional features and functionality by connecting other on-board NMEA instruments ...ie: AIS receiver, DSC radio, Autopilot, LOG, Sounder, Radar and Wind Instruments.

uses **C-MAP** charts

Simon Blundell, developer of SOB, supplied Justin and James of **Lot 41** "Crossing the Ditch" fame SOB software to kayak from Australia to New Zealand.

**Pacific Sailing School** Principal Terry Wise used SOB to find **Lot 41**, 140k from New Zealand and assisted them to a Safe Landing.

*"Simon's SOB is the best navigation system I have seen.  
Everyone should have this on board, it is so easy to use and affordable.  
It is now part of our standard training for offshore and navigation"*  
Quote - Terry Wise.
